Professional Summary

Backend-focused Software Engineer with production ownership across five SaaS products, including a FastAPI platform serving 50K+ users. Experienced in Django, FastAPI, PostgreSQL, Redis, payment integrations, GCP deployments, and zero-downtime migrations. Independently took Waddi's client-facing CRM from ideation to production as sole developer.

Experience

Bottrion Systems Pvt. Ltd. Remote
Software Development Engineer Aug 2026 – Present
Junior Full Stack Engineer Aug 2025 – July 2026

- Took sole backend ownership of Khayyal, a KSA SaaS platform serving 50K+ users; reverse-engineered and documented its FastAPI architecture after an engineer transition while maintaining zero downtime.
- Independently designed, built, and launched Waddi's client-facing CRM using React, TypeScript, Django REST Framework, and PostgreSQL.
- Fixed abandoned-checkout payment-state defects across Razorpay, STC Pay, and Dhamen Pay that falsely marked 25+ transactions unpaid per incident; added pytest regression tests to prevent recurrence.
- Optimized OpenAPI schema generation with Redis-backed caching, reducing Swagger documentation load time from 5–10 seconds to under one second.
- Leading the zero-downtime migration of 131 endpoints from FastAPI to Django, using API versioning to preserve existing client integrations.
- Owned CI/CD and GCP deployments across five SaaS products; standardized Linux log-triage workflows, reducing incident diagnosis from hours to minutes.

IBM & Rooman Technologies Pvt. Ltd. Sep 2024 – Mar 2025
AI/DevOps Intern

- Implemented Jenkins CI/CD pipelines and Docker-based environments, reducing deployment setup overhead for a four-person development team.

Technical Skills

Backend: Python, Django, Django REST Framework, FastAPI, REST APIs, JWT, Webhooks, Redis, OpenAPI, API Versioning, System Design
Frontend: TypeScript, JavaScript, React.js, Next.js
Databases: PostgreSQL, SQL, MongoDB
Cloud and DevOps: GCP, Docker, Jenkins, CI/CD, Linux, Git
Testing: pytest, Unit Testing, Integration Testing, Performance Optimization
AI/ML: Gemini, Azure OpenAI, Claude, Mistral, MediaPipe, Computer Vision, Whisper, Parakeet

Projects

AI Mock Interview Platform *Next.js, MediaPipe, Whisper, Parakeet, Gemini*

- Built video and audio pipelines that extract facial and pose signals and generate structured interview feedback using Gemini.
- Moved MediaPipe processing from server to browser, reducing processing time from approximately 60 seconds to 5–6 seconds while lowering server load and bandwidth usage.
- Integrated Whisper and Parakeet transcription and added Redis caching, reducing repeated pipeline-loading time by 50%.

Wakat *Django, Celery, React, PostgreSQL*

- Shipped a multi-tenant ZATCA Phase 2 e-invoicing and accounting platform for Saudi businesses, generating UBL XML invoices with per-device hash chains, ECDSA signatures, and nine-tag TLV QR codes, and submitting them to ZATCA's Fatoora platform for clearance and reporting.
- Built the surrounding books in Django and Celery – subscriptions, purchases, chart of accounts, journals, VAT returns, and payroll – with a React app handling onboarding, device management, and CSID lifecycle.

Complia.in *Django, React, Azure OCR, Tesseract*

- Built and launched a compliance-notice parsing platform that acquired 50+ users, combining Azure OCR and Tesseract with a Django and React workflow.

Education

Bachelor of Engineering in Information Science and Engineering 2021 – 2025
Visvesvaraya Technological University

Publication & Certifications

Publication: "Advancements in Deep Learning for Autonomous Driving in Indian Road Conditions," *Journal of Intelligent Data Analysis and Computational Statistics*, 2024.
Certifications: NASSCOM AI DevOps Engineer • NPTEL Cloud Computing • IBM Introduction to Cloud • IBM DevOps Practices
