Abdul Basith Maaz

(+91)9901061725 maazabdulbasith@gmail.com Bengaluru, India Github Linkedin

Professional Summary

Backend-leaning Full Stack Developer with production ownership across 5 SaaS products at a startup, including legacy codebase recovery, payment systems, scalable system design, and a self-built CRM portal taken from concept to client delivery.

Core Technical Skills

Backend: Python, FastAPI, Django, REST Framework, JWT, Webhooks, Payment Gateways (Razorpay, STC Pay, Dhamen Pay), Redis, OpenAPI/API versioning, Caching, System Design.

Frontend: React.js, JavaScript, TypeScript, Next.js

Database: SQL, PostgreSQL, MongoDB

Infrastructure: GCP, Linux (server ops, log analysis), Docker, CI/CD, Git

AI/ML: LLM API Integration (Gemini, Azure OpenAI, Claude, Mistral), MediaPipe, Computer Vision, Speech-to-Text (Whisper, Parakeet), AI-Assisted Development

Practices: Agile/Scrum, Sprint Planning, Unit & Integration Testing (pytest), Performance Optimization

Education

B.E - Information Science and Engineering, *Visvesvaraya Technological University* 2021–2025

Projects

AI Mock Interview Platform *(Latest Project) — Next.js, MediaPipe, Parakeet, Whisper, Gemini*

- Built video/audio pipelines scoring candidate expressions and body language using facial landmarks; integrated Parakeet and Whisper for robust transcription.
- Migrated MediaPipe extraction to client-side, cutting processing time by 90% (˜60s to ˜5–6s) and reducing server load/bandwidth.
- Introduced Redis caching into the ML pipeline, cutting loading time by 50%.

Complia.in *(Launched — 50+ Users) — Python, Django, React, Azure OCR, Tesseract*

- Compliance notice parsing platform — built, launched, and grew to 50+ users; sunset after determining the trust-barrier problem in Indian SMB tax tooling required a different distribution model than direct-to-user.
- Document ingestion pipeline using Azure OCR and Tesseract for structured data extraction from regulatory notices.

Translay.in *(In Development) — Python, Django, React, DeepL API*

- Real-time on-screen translation product rendering on-screen content into a target language; sole developer, architected a low-latency screen capture and overlay pipeline with DeepL API integration.

Experience

Backend Developer - *Bottrion Systems Pvt Ltd* August 2025 – Present

- Took sole backend ownership of Khayyal (50k+ users, KSA market) after the previous engineer's departure, reverse-engineering an undocumented FastAPI codebase to restore full system visibility with zero downtime.
- Designed and shipped Waddi's client-facing CRM portal (React/TypeScript, Django REST, SQL-backed PostgreSQL) from concept to launch as sole developer.
- Root-caused webhook bugs (Razorpay, STC Pay, Dhamen Pay) traced to abandoned checkouts; wrote pytest-based validation checks to eliminate 25+ false-unpaid cases per incident.
- Improved API scalability and performance by implementing Redis caching on high-traffic endpoints, cutting Swagger docs load time from 5–10s to under 1 second.
- Leading a system-design-driven, zero-downtime FastAPI to Django migration for Khayyal across 131 endpoints.
- Managed CI/CD and GCP deployments for 5 SaaS products; built Linux log-analysis workflows that cut incident response times from hours to minutes.

AI-DevOps Intern - *IBM & Rooman Technologies Pvt Ltd* Sept 2024 – Mar 2025

- Implemented CI/CD pipelines (Jenkins, Docker) and configured containerised environments, reducing deployment setup overhead for a 4-person team.

Achievement & Certifications

Publication: "Advancements in Deep Learning for Autonomous Driving in Indian Road Conditions" — *Journal of Intelligent Data Analysis and Computational Statistics* (2024)

Certifications: Nasscom AI DevOps Engineer • NPTEL Cloud Computing • IBM Introduction to Cloud • IBM DevOps Practices
