Professional Summary

Backend-focused Software Engineer with production ownership across five SaaS products, including a FastAPI platform serving 50K+ users. Experienced in Django, FastAPI, PostgreSQL, Redis, payment integrations, GCP, and zero-downtime migrations. Took the Waddi client-facing CRM from ideation to production as sole developer.

Experience

Bottrion Systems Pvt. Ltd. Remote
Software Development Engineer Aug 2026 - Present
Junior Full Stack Engineer Aug 2025 - July 2026

- Took sole backend ownership of Khayyal, a KSA SaaS platform serving 50K+ users; reverse-engineered and documented its FastAPI architecture after an engineer transition while maintaining zero downtime.
- Built and launched the Waddi client-facing CRM solo with React, TypeScript, Django REST Framework, and PostgreSQL.
- Fixed abandoned-checkout payment-state defects across Razorpay, STC Pay, and Dhamen Pay that falsely marked 25+ transactions unpaid per incident; added pytest regression tests to prevent recurrence.
- Optimized OpenAPI schema generation with Redis caching, cutting Swagger docs load from 5-10 seconds to under 1 second.
- Led the zero-downtime migration of 131 endpoints from FastAPI to Django, using API versioning to preserve client integrations.
- Owned CI/CD and GCP deployments across five SaaS products; standardized Linux log-triage workflows, reducing incident diagnosis from hours to minutes.

IBM & Rooman Technologies Pvt. Ltd. Sep 2024 - Mar 2025
AI/DevOps Intern

- Implemented Jenkins CI/CD pipelines and Docker environments, cutting deployment setup overhead for a four-person team.

Technical Skills

Backend: Python, Django, Django REST Framework, FastAPI, REST APIs, JWT, Webhooks, Redis, OpenAPI, API Versioning, System Design
Frontend: TypeScript, JavaScript, React.js, Next.js, WebAssembly
Databases: PostgreSQL, pgvector (vector database), SQL, MongoDB
Cloud and DevOps: GCP, Docker, Jenkins, CI/CD, Linux, Git
Testing: pytest, Unit Testing, Integration Testing, Performance Optimization
AI/ML: LLM APIs (Gemini, Azure OpenAI, Claude, Mistral), RAG, Hybrid Search, Embeddings, Prompt Engineering, LangGraph (LangChain ecosystem), LlamaIndex, Computer Vision, OCR, Speech-to-Text (Whisper)

Projects

AI Mock Interview Platform *Next.js, MediaPipe, Whisper, Parakeet, Gemini*

- Built video and audio pipelines that extract facial and pose signals and generate structured interview feedback with Gemini.
- Moved MediaPipe processing from server to browser, cutting processing time from about 60 seconds to 5 to 6 seconds and lowering server load.
- Added Whisper and Parakeet transcription with Redis caching, cutting repeated pipeline-loading time by 50%.

Wakat *Django, Celery, React, PostgreSQL*

- Shipped a multi-tenant ZATCA Phase 2 e-invoicing platform for Saudi businesses: UBL XML invoices with per-device hash chains, ECDSA signatures, nine-tag TLV QR codes, and ZATCA Fatoora clearance and reporting.
- Built the accounting layer in Django and Celery (subscriptions, purchases, journals, VAT returns, payroll) with a React app for onboarding, devices, and CSID lifecycle.

Shelf | Live Product (Beta: theonlyshelf.vercel.app) *Next.js, FastAPI, pgvector, LangGraph, LlamaIndex*

- Shipped a privacy-first screenshot search product that runs 100% on-device or at about 200 ms per image, with a dual-engine pipeline: WebAssembly OCR (Tesseract.js) and serverless Gemini 2.5 Flash vision (6 parallel workers) extracting text, captions, and 15+ semantic tags.
- Raised Recall@5 to 1.000 and MRR to 0.903 (full-text baseline 0.833, 12-query benchmark) by fusing OCR full-text, bge-small text embeddings, and CLIP image embeddings in PostgreSQL pgvector with Reciprocal Rank Fusion (k=60), plus a client-side semantic synonym engine.
- Hardened answers against prompt injection and thin evidence (keyless CI gate, action precision 1.0) using a LangGraph ingestion state machine and a LlamaIndex-grounded synthesizer that cites exact on-image text; added File System Access, ClipboardItem, and Web Share APIs.

Education

Bachelor of Engineering in Information Science and Engineering 2021 - 2025
Visvesvaraya Technological University

Publication & Certifications

Publication: Advancements in Deep Learning for Autonomous Driving in Indian Road Conditions, *Journal of Intelligent Data Analysis and Computational Statistics*, 2024.
Certifications: NASSCOM AI DevOps Engineer • NPTEL Cloud Computing • IBM Introduction to Cloud • IBM DevOps Practices
